TUBULAR SHELVES FOR HEAVY AND LARGE LOADS

• An evolving system in both height and length. It allows joining an "initial" module to one or two of the "following" modules. It is available in kit or not, it can be assembled fast and without any tools • **Vertical structure** in steel of section 40 X 20 X 10, thickness of 1,25mm. Metal wedge of 36 X 80mm, pre-perforated in Ø 10mm so that a fixation to the floor, if desired, can be done. Reinforcement of steel of 12/10th in posts bases • **Adjustable plates** every 5cm. Fixation by connectors with three hooks, blockage by safety pins. Plates composed by side beams, by intermediate section tubes of 40 X 20 of 10/10th thick, and by depth scale beams of 10/10th thick which are reinforced by a squareness of 12/10th thick • **Painting** in epoxid blue RAL 5005 and grey RAL 7035 dust.
